The RVM Difference

Protect Your Assets with Remote Video Monitoring

Cameras Without Monitoring Only Show Crimes That Have Already Taken Place

Pro-Vigil pairs high-tech cameras and advanced software with live video monitoring done by a virtual guard to identify – and stop – crime as it's happening. We deter intruders 97% of the time and dispatch law enforcement for the remaining 3%, proactively stopping crime in its tracks.

Pro-Vigil Deters 97% of Intruders Without Calling Authorities

Protecting Your Assets in Three Simple Steps

24 Seconds

30 Seconds

2 Minutes

DETECT
Remote surveillance flags unusual and unwanted activity with machine learning video analysis

DETER
Both audio and visual deterrents are activated after a virtual guard verifies the threat

DISPATCH
When needed, 911 authorities are dispatched by your virtual guard

Protect your high-value assets and reduce risk. Remote Video Monitoring stops intruders and vandals before they inflict loss or damage on your property. If someone attempts to enter a restricted area, our advanced recognition software detects the threat and responds with audiovisual deterrents.

Audio Deterrent Services
Notify intruders with a loud warrning that they have been spotted and authorities will be contacted

Visual Deterrents
Deploy bright, flashing lights to alarm intruders that they have been spotted
